

Taekyung Kim

Experienced software engineer with a focus on building engaging & accessible digital experiences

Profile

Detail-oriented Front-End Developer with a focus on building intuitive, responsive, and accessible web applications. Skilled in HTML, CSS, JavaScript, and React, with a passion for creating seamless user experiences. Experienced in collaborating with diverse teams across multiple countries and quickly adapting to new environments. Committed to continuous learning, improving web accessibility, and driving innovation through teamwork to create impactful, user-centered solutions.

Experience

Junior Engineer · Optatum Platform Sep 2022 — Jan 2025

- Designed and developed user and admin dashboards for the payment solution, enabling seamless management of transaction history, settlements, billing, and user administration. Built with React, TypeScript, MUI, React Query, and TanStack Table to ensure a scalable and efficient user experience.
- Led the development of a blockchain platform, utilizing Next.js, Prisma, Wagmi, and Tailwind CSS. Designed the overall UI/UX in Figma, translating it into a functional and responsive front-end while also contributing to back-end integration.

Frontend Engineer Training Program · Jan 2022 — Aug 2022 Green Computer Academy

- Proficient in HTML, CSS, jQuery, JavaScript, and React, with extensive experience in crafting responsive, interactive web applications. Adept at optimizing website performance and functionality to ensure seamless user experiences across various platforms.
- Experienced in UI/UX design using Adobe XD, focusing on creating user-centered, visually engaging interfaces. Skilled in applying user-centered design principles and responsive design techniques to enhance usability and overall user satisfaction.
